SUMMARY

Computer Science senior with hands-on experience in Python, Java, and C++. Passionate about developing efficient algorithms, software solutions, and embedded systems. Seeking to apply my skills in a professional setting through an internship focused on software development, embedded systems, or algorithm optimization.

EDUCATION

B.S. Computer Science (Software Engineer) 2023- in progress

Arizona State University, Tempe, AZ

3.13 GPA

Relevant Coursework: Data Structures and Algorithms, Cryptography.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python

- Implemented sorting algorithms and binary trees in C++ and Java as part of coursework and coding assignments.
- Led Python programming for an IoT-based assistive device using Raspberry Pi, enhancing accessibility for handicapped individuals.

Embedded Systems & Hardware:

- Worked with Raspberry Pi for integrating software with hardware components in the Safety Pack project.

Software Development:

- Experience with object-oriented programming (OOP) and data structures in Java and C++.
- Developed efficient algorithmic solutions in Python, optimizing performance for hardware applications

PROFESSIONAL EXPERIENCE

The Coder School, Irvine, California: Coding Coach

Mar 2022 – June 2022

- Taught Java programming to children, breaking down fundamental coding concepts into engaging lessons.
- Developed interactive coding exercises to enhance student understanding and retention.

PROJECTS

Safety Pack, Class Project

Spring 2024

- Led Python programming and hardware integration using Raspberry Pi for an assistive device worn on the waist.
- Designed and implemented sensor-based alert systems to help handicapped individuals be aware of their surroundings.

Basic Snake game, personal project

Spring 2022

- Developed a Java-based snake game using the StdDraw graphics library.
- Designed and coded an efficient movement and collision detection algorithm.

Nurtura, Club project

- Assisted in coding the backend of a data system. Such as the login and logout page.

Spring 2025

WORK EXPERIENCE

Starbucks Coffee Company, Irvine, CA: Barista

April 2019 – Sep 2019

- Delivered exceptional customer service in a fast-paced retail environment, efficiently handling high-volume orders.
- Developed strong teamwork and multitasking skills while collaborating with colleagues during peak hours.

ACTIVITIES

Software Developers Association, Tempe, AZ

Jan 2023 – present

- Participate in weekly meetings to enhance knowledge of Computer Science and Software Engineering topics.
- Engage in collaborative coding challenges and hackathons to improve problem-solving skills.
